EXPERIENCE

PROJEKT202 (FORMERLY CAPTURA)

PRINCIPAL UX DESIGNER

March 2011 -

*My time at projekt202 has seen my horizons expand to include serious user-centric research in my design efforts. I have been to the field (literally; a corn field to talk to a farmer) many times now in pursuit of firsthand user observation. And – naturally – I've continued growing my consulting, design, and communication skills for an ever-diversifying roster of clients including **The Container Store**, **Expedia**, and **7-Eleven**.*

DOUBLEWIDE LABS

DESIGNER

July 2009 - December 2010

*Doublewide Labs pushed my boundaries, driving me to produce the editorial **You+Dallas** website here as well as the redesign and revitalization of our own online invoicing app, **Blinksale**. In addition, we designed and launched **Monetizer**, a great way to sell videos online. I really got a taste for leading product development, got the experience of working as an in-house designer on a web app, and generally had the support of a team that allowed me to do what I consider to be my best work ever.*

VIEWZI

DESIGNER

June 2008 - December 2008

As a Visual Designer at Viewzi, I produced interface designs for the Viewzi web application, specialized search UIs and other special projects. In many ways, this job was envisioning “what could be” – kind of what I imagine a think tank would be like. Definitely a liberating and rewarding experience, and quite up my alley to boot.

BRIGHT CORNER → GENIANT → EMC

VISUAL DESIGNER

May 2005 - June 2008

*I began this Russian nesting doll-esque adventure of company acquisitions as a Visual Designer at Bright Corner. I was able to gain valuable experience in information architecture, interaction design, icon design and some logo/identity work, all while continuing to primarily serve as a Visual Designer. I worked on complex web applications (Backgroundchecks.com), e-commerce websites (**Handango.com**), intranets (**Brinks**, **Turner Construction**) and even a native Windows application (**eInstruction**).*

FEEL LIKE GOING BACK TO 1999?

I can reminisce about more employment experience at your request. Ask me about the time I worked out of my boss's guest bedroom for 2 months. Yep. That happened. Dotcom bubble, you so crazy!

I'M ALL ABOUT

making sure that systems, interfaces, language and graphics are human-friendly, emotive, aesthetically pleasing, clear, on-brand and usable – with a touch of mellow smoothness. Technology should work for people, not the other way around.

ACCOLADES

Published on the [InVision Blog](#), 2016

Published on many CSS gallery sites back in the day

Technical Editor, *The Art & Science of CSS*

Two Gold ADDY Awards, 2005

Linked by Jeffrey Zeldman, 2004
